

2018/12/11 - A stroll through blender 2.8 walk cycle

Just thought it would be cool to share this video. Love Blender 2.8. The interface, the way it works... Thanks to [Andrew Kramer](#) who introduced me to blender back in 2006. It was still Blender 2.3 (or 2.4, can't remember) back then... How far has it come. As a guy who works on Open Source, I appreciate the amount of effort and time it takes to develop software like this... Keep it up, [Blender Foundation](#). If you use blender, think about making a monthly [contribution](#).
