

2018/12/04 - Mind Map

I was feeling a bit lost, jumping around between different tasks, which is not an issue in and of itself, but without a plan, it could lead to not accomplishing much. I decided to step back and put a task list together. I use a mind mapping tool. This task list will be continuously changing. Unfortunately, I don't have a way to actually make the mind map viewable on the site. But here is a link to [download](#) it. You can use "[freeplane](#)" for linux or "[freemind](#)" for windows to open it.

You can visit this [page](#) for a text based version of the map.
